

Simple steps. Safe schools.

Wear a face covering.

Wearing a mask or other face covering over your nose and mouth is one of the most effective ways to protect yourself and others.

Maintain physical distancing.

Keep a safe distance of at least six feet from other people whenever possible.

When physical distancing is not possible, be sure to wear a face covering.

Wash your hands often.

Wash your hands frequently with soap and water or hand sanitizer, especially before and after every meal or snack.

Screen for symptoms daily.

Before coming to school every day, every student and adult must be screened for fever, cough, difficulty breathing, and other symptoms.

Remain in your stable group.

Throughout the day, stay with the same group of students and adults (your "stable group" or "pod") to prevent the spread of the virus. Maintain safe distance from other stable groups.

Stay home if you are sick.

If you have symptoms such as fever or chills, coughing, difficulty breathing, or loss of taste/smell, do not come to school. Contact your doctor or medical provider.

Create air flow in the room.

When possible, open windows and operate fans to keep fresh air moving in and stale air moving out of classrooms and other school spaces.
