Pathways to Success

The Newport Area Career and Technical Center (NACTC) provides students with a unique experience through hands-on learning projects, student-run businesses and industry partnerships. By joining the NACTC community, you have a unique advantage that will set you apart from your peers by preparing you to meet the demands of college entrance and a successful career.

Students will build a solid 21st Century Education through:

- A combination of academic and technical skills for both college and career readiness
- Real-world opportunities such as job shadowing, internships and student-run businesses
- Participation in student competitions like SkillsUSA and related scholarships
- College credit through dual-enrollment and articulation agreements with institutions like CCRI, RIC, NEIT and more
- Individualized learning that provides strong student supports and access to general, Honors and Advanced Placement course offerings

Newport recently launched an innovative new program called Pathways in Technology Early College High School (P-TECH) where students have the opportunity to obtain a high school diploma and associate degree from the Community College of Rhode Island. PTECH is a school-within-a-school model that uses a personalized approach to education, combining blended learning, real-world experience and college coursework to engage students and empower them to take ownership of their future.

PTECH Students have the unique opportunity to:

- Graduate with a high school diploma and an associate degree in Cybersecurity
- Gain professional experience through job shadow and internship opportunities
- Get the support and guidance from an industry mentor
- Complete the program over a 4-6 year individualized pace
- Get the inside track to a high growth, high wage career
