

E-Cigarette use among young people has officially surpassed traditional cigarette use. ENDS products are the newest trends we are seeing in youth use. Perception of harm is also at an all-time low since the majority of students see this as a safe alternative to smoking tobacco. Highlighted in this presentation, Heidi Driscoll, Director of the South County Regional Coalition will discuss the history of, recent studies and have on hand a tool kit of ENDS products.

Presentation at 5:00 in the library
