No. 2440

Administration - Risk Management -

Health-Related Policy For

Students at Risk

Page 1 of 1

In order to minimize the risk to students who have health conditions that may threaten their well-being at school, i.e., seizure disorder, heart problems, severe allergies to bee stings, it shall be the policy of the Newport School Department to have the nurse notify the students' teachers of these conditions. The teachers will have this information available with seating charts and attendance lists, so that substitute teachers may access this information in a timely fashion.
